Please give the ACP due process.

N.C. environmental regulators (DEQ) who are responsible for protecting our natural resources have not reviewed all of the potential impacts on our public resources. and they haven't even evaluated the limited and misleading economic information sent by ACP, LLC following DEQ's "additional information request." The governor MUST call for more public hearings, (at least 3 sites distributed along the pipeline corridor) to collect input on a project that could harm our communities for decades to come.

I find it hard to believe that Gov. Cooper would even consider going ahead with the ACP under these circumstances. I am even feeling sorry that I voted for him. "Not Trump" is not going to cut it this time around. I am considering changing my registration to Independent and voting for the Greens--or simply not voting--if this trend toward corporations over people continues. This is not my Democratic Party anymore.
